These services are usually covered by Medical assistance and may be covered by private insurance or Medicare.

Schmitt Woodland Hills offers a full continuum of care services. Our home care services are an approved Family Care provider offering custodial services, as well as therapeutic services to people able to receive care from their home. We have 38 independent living apartments of one or two bedroom units, available for both long term and seasonal residency. The units have parking, storage, and support services as needed. The Westview building is an accredited 30 bed assisted living center or CBRF. And finally, Schmitt Woodland Hills offers a licensed Medicare approved 25 bed nursing home providing 24 hour skilled care and full Rehab services. We have fully accessible transportation to meet our residents needs.

*The independence people want
 with assistance when needed.*

Broad range of services

Our comprehensive skilled nursing and rehabilitation center serves the care needs of a wide variety of residents. Many are looking for active treatment to get back on their feet as they recover from surgery, a severe injury or a debilitating illness.

Schmitt Woodland Hills offers post-acute services for those transitioning from hospital to home. This outcome focused care helps shorten recovery time and lays the groundwork for a successful discharge home or to a lower level of care.

A history of success

Schmitt Woodland Hills provides skilled nursing and rehabilitative care through registered and licensed practical nurses, certified nursing assistants, and occupational, physical and speech therapists. This care is complimented by social work, activities, nutrition services, housekeeping, laundry services, and transportation. We use a team approach to work with patients and their families in designing an individualized plan of care to address patients needs. Our rehab program works to improve function and return residents to their home or the community.

Continuum of care

Our campus offers many levels of service. The Rehab center offers skilled nursing care while West View our assisted living helps in a less intensive setting. Our community includes independent living apartments with services available and we have home care options for those returning to the community. This Continuum of care helps address the many situations of recovery. And our facility often can also offer ways for out of town family and friends to remain close to provide support and love.
